

Data Flow Diagram

Date	26 March 2026
Project Name	Smart Lender

Data Flow Diagram

The Data Flow Diagram (DFD) represents the flow of data within the Smart Lender system. It illustrates how applicant information is processed, stored, and used by the machine learning model to generate loan approval predictions.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how data flows through the Smart Lender system, showing the interaction between external entities, processes, and data stores. It provides a clear view of how applicant information is collected, processed, verified, and used by the machine learning model to generate the final loan approval or rejection prediction.
